

PBL items can be e.g.

- features (e.g. with user stories)
- other kind (non-functional) requirements that need work done all over the product
- pre-work, post-work
- usability test, acceptance test

Customer
(and/or end-users)

frequent communication

PO

- creates the product vision
- updates vision in form of PBL items
- explains PBL items
- accepts PBL items done

e.PO

could be also an external =
customer PO.
But external PO still part of
The Scrum team

Other stakeholders

(management, finance, legal, government, ...)

daily
communication

The Development team

- * 3-9 members, self-organizing, manages work
- * some could double as part PO/SM and dev

SM

- teaches Scrum
- enforces Scrum
- removes obstacles
- facilitates (meeting rooms, tools etc.)
- shields the Team from unwanted outside inference

“servant coach”
